

Claims

- [c1] What is claimed is:
 - 1.A display device comprising:
 - a display; and
 - a display base comprising:
 - a housing; and
 - a luminous module installed inside the housing for emitting light.
- [c2] 2.The display device of claim 1 wherein the display comprises a first electric connecting port and the display base further comprises a second electric connecting port for connecting to the first electric connecting port and receiving the electric power from the display to supply the operating electric power of the luminous module.
- [c3] 3.The display device of claim 2 wherein the display further comprises a light control module for controlling the energy of light emitted by the luminous module.
- [c4] 4.The display device of claim 1 wherein the display is a plasma television.
- [c5] 5.The display device of claim 1 wherein the display is an LCD television.

- [c6] 6.The display device of claim 1 wherein the luminous module comprises a plurality of light-emitting diodes (LEDs).
- [c7] 7.The display device of claim 1 wherein the housing of the display base is made of transparent material.
- [c8] 8.The display device of claim 1 wherein the housing of the display base is made of wear-resisting material.
- [c9] 9.The display device of claim 1 wherein a pattern is on the housing of the display base, and the pattern refracts light emitted by the luminous module.
- [c10] 10.The display device of claim 9 wherein the pattern includes a mist surface for refracting light emitted by the luminous module.
- [c11] 11.The display device of claim 9 wherein the pattern is made from a notch of the housing.
- [c12] 12.The display device of claim 9 wherein the pattern is made from a flange of the housing.
- [c13] The display device of claim 1 wherein the display base further comprises a power module for supplying the electric power for the luminous module.
